

SAR SHALOM SIMCHI

Senior Software Engineer - Java | Spring Boot | Microservices

+972-54-5710525 | sarshalom.simchi@gmail.com | [linkedin.com/in/sarshalomsimchi](https://www.linkedin.com/in/sarshalomsimchi) | sarshalomsimchi.github.io

Professional Summary

Senior Software Engineer with more than 18 years of experience building and maintaining Java-based server-side and web systems across SaaS, telecom, IoT, storage, trading, and enterprise environments. Strong background in Java, Spring Boot, microservices, REST APIs, SQL databases, testing, clean code, design patterns, and Agile delivery, and practical experience with MongoDB and NoSQL. Experienced in code reviews and mentoring, with working knowledge of AWS services and CI/CD tooling. Currently directing several independent software projects through structured AI-assisted workflows covering requirements, task coordination, functional testing, defect identification, and iterative delivery.

Summary of Expertise

Java, Spring Boot, Microservices, RESTful APIs, SQL, MongoDB, NoSQL, SaaS, IoT, CI/CD, Jenkins, Maven, JUnit, Agile/Scrum, Clean Code, SOLID, Design Patterns, TDD, Code Reviews, Mentoring, Requirements Analysis, AI-Assisted Software Development, AWS (EC2, S3, CloudWatch), Linux.

Selected Independent Projects | 2026 - Present

AgriScan | AI-Assisted Mobile Product | Beta Preparation | agriscan.app

- Define product requirements, feature priorities, user flows, testing criteria, user-facing disclaimers, and beta scope for an Android application that provides preliminary visual soil estimates from images.
- Coordinate AI-assisted implementation across ChatGPT, Codex, Replit, GitHub, Firebase, Gemini, and Canva; review completed functionality, test releases, identify defects, and direct iterative improvements.

Agent Tycoon | AI-Assisted Strategy Game | In Development

- Define the game concept, gameplay systems, progression, user flows, feature priorities, and testing criteria; coordinate and review AI-assisted implementation and iterative gameplay refinement.

AI-Assisted Job Search Systems | Private Web Applications | Active Development

- Define search criteria, role-matching behavior, dashboard structure, filters, application tracking, and notification workflows for two personalized job-search systems; test and refine results iteratively.

Technical Skills

Languages & Frameworks: Java, Kotlin, Groovy, Spring Boot, Spring, Grails, JSF, Vaadin, Hibernate, JPA, REST APIs, HTML, CSS, JavaScript, jQuery, AJAX, JSON

Databases: Oracle, SQL Server, MariaDB, MySQL, SQL, PL/SQL, MongoDB, NoSQL

Cloud & DevOps: AWS (EC2, S3, CloudWatch), Jenkins, Git, GitHub, Bitbucket, SVN, CI/CD pipelines, Maven, Veracode, Black Duck, Linux

Testing & Tools: JUnit, Mockito, Cucumber, JSystem, Swagger/OpenAPI, Jira, Confluence, Bugzilla, Eclipse, IntelliJ

Servers & Integration: Tomcat, JBoss, ActiveMQ

Professional Development: Software Architecture, System Design, Docker, Kubernetes, Kafka, Python, and C++ coursework / hands-on labs

Professional Experience

AgileSparks | Senior Software Engineer (Consultant at NICE, previously at Ribbon) | 2022 - Present

- Develop and maintain Java backend services for a large-scale SaaS contact-center platform using Java 17, Spring Boot, microservices, and REST APIs.
- Previously contributed to telecom microservices and a Network Planner web application used by multiple telecom companies.
- Mentor junior developers and participate in code reviews.

Technologies: Java 17, Spring Boot, Microservices, REST APIs, JPA, SQL, MySQL, MariaDB, AWS, Linux, GitHub, Bitbucket, Jenkins, Jira, Confluence, Maven, Cucumber, JSystem, JUnit, Black Duck, Veracode

ContGuard (Startup) | Senior Backend Developer | 2021 - 2022

- Developed backend functionality for an IoT cloud platform supporting real-time shipping-container telemetry, anomaly detection, streaming, and alerting workflows.

Technologies: Java, Kotlin, Spring Boot, SQL, Jenkins, Git, CI/CD

Western Digital | Principal Engineer, Software Development Engineering | 2018 - 2021

- Developed and maintained a log analytics web application using Java, Vaadin, MongoDB, and REST APIs.
- Implemented functionality for processing, searching, and analyzing system logs in Linux environments.

Technologies: Java, Vaadin, MongoDB, REST APIs, Tomcat, Linux, Jenkins, Git, Confluence

Nextrade Technologies (Startup) | Senior Java Full Stack Developer | 2013 - 2018

- Developed and maintained features for a web-based trading platform across backend, data, and frontend components.
- Mentored junior developers and participated in code reviews.

Technologies: Java, Spring, Groovy, Grails, Hibernate, SQL Server, SQL, REST APIs, Tomcat, Maven, Bugzilla, HTML, CSS, JavaScript, jQuery, SVN

Prodware | Microsoft Dynamics AX Developer | 2011 - 2013

Malam-Team (Coral) | Java / JSF Full Stack Developer | 2007 - 2010

Bezeq | Telecommunications Field Operations / Project Team Leadership | 2000 - 2007

Education & Professional Development

B.A. in Science, Computer Science Major - The Open University of Israel | 1999 - 2005

Graduated with Honors; Dean's Honors List

- Software Architecture & System Design (2023 - 2024)
- Spring Boot 3 & Spring Framework 6
- Docker & Kubernetes - hands-on labs
- AWS - EC2, S3, and CloudWatch
- Apache Kafka Essential Training
- Conducting Code Reviews - LinkedIn Learning
