SAR SHALOM SIMCHI

Senior Software Engineer - Java | Spring Boot | Microservices

+972-54-5710525 | sarshalom.simchi@gmail.com | linkedin.com/in/sarshalomsimchi | sarshalomsimchi.github.io

Professional Summary

Senior Software Engineer with more than 18 years of experience developing and maintaining Java-based backend and web systems across SaaS, telecom, IoT, storage, trading, and enterprise environments. Strong background in Java, Spring Boot, microservices, REST APIs, SQL/NoSQL databases, testing, clean code, design patterns, and Agile delivery. Experienced in code reviews and mentoring, with working knowledge of AWS and CI/CD. Over the past year, I have initiated and coordinated independent AI-assisted software projects, defining requirements, organizing tasks, validating functionality, and investigating blockers.

Summary of Expertise

Java, Spring Boot, Microservices, RESTful APIs, SQL, MongoDB, NoSQL, SaaS, IoT, CI/CD, Jenkins, Maven, JUnit, Agile/Scrum, Clean Code, SOLID, Design Patterns, TDD, Code Reviews, Mentoring, Requirements Analysis, AI-Assisted Development Coordination.

Selected Independent Projects | 2026 - Present

AgriScan | AI-Assisted Mobile Product | Android Beta | agriscan.app

• Define product requirements, priorities, user flows, acceptance criteria, and disclaimers for an Android app providing preliminary visual soil screening from images.

• Coordinate implementation through AI coding tools; test Android beta builds, identify defects, and guide iterative improvements.

Agent Tycoon | AI-Assisted Strategy Game | In Development

- Define game systems, progression, and user flows; coordinate AI-assisted development using Replit, test gameplay, and direct fixes.

Job Search Automation | AI-Assisted Software Project | In Development

- Lead a job-search automation project following two earlier web tools, covering Gmail intake, job review, browser application workflows, and tracking.
- Coordinate AI development and QA roles, using Codex and other AI tools; track GitHub tasks, investigate failures, and test outcomes; identify promising AI tools and delegate their evaluation to specialized AI agents.

Technical Skills

Languages & Frameworks: Java, Kotlin, Groovy, Spring Boot, Spring, Grails, JSF, Vaadin, Hibernate, JPA, REST APIs, HTML, CSS, JavaScript, jQuery, AJAX, JSON

Databases: Oracle, SQL Server, MariaDB, MySQL, SQL, PL/SQL, MongoDB, NoSQL

Cloud & DevOps: AWS (EC2, S3, CloudWatch), Jenkins, Git, GitHub, Bitbucket, SVN, CI/CD pipelines, Maven, Veracode, Black Duck, Linux

Testing & Tools: JUnit, Mockito, Cucumber, JSystem, Swagger/OpenAPI, Jira, Confluence, Bugzilla, Eclipse, IntelliJ

Servers & Integration: Tomcat, JBoss, ActiveMQ

Professional Development: Architecture, System Design, Docker, Kubernetes, Kafka, Python/C++ coursework

AI-Assisted Workflows: Codex, Replit, Base44, Gemini; agent coordination, testing, technology review

Professional Experience

AgileSparks | Senior Software Engineer (Consultant at NICE, previously at Ribbon) | 2022 - Present

- Develop and maintain Java backend services for an enterprise SaaS contact-center platform using Java 17, Spring Boot, microservices, and REST APIs.
- Previously contributed to telecom microservices and a Network Planner web application used by multiple telecom companies.
- Mentor junior developers and participate in code reviews.

Technologies: Java 17, Spring Boot, Microservices, REST APIs, JPA, SQL, MySQL, MariaDB, AWS, Linux, GitHub, Bitbucket, Jenkins, Jira, Confluence, Maven, Cucumber, JSystem, JUnit, Black Duck, Veracode

ContGuard (Startup) | Senior Backend Developer | 2021 - 2022

- Developed backend functionality for an IoT cloud platform supporting real-time shipping-container telemetry, anomaly detection, streaming, and alerting workflows.

Technologies: Java, Kotlin, Spring Boot, SQL, Jenkins, Git, CI/CD

Western Digital | Principal Engineer, Software Development Engineering | 2018 - 2021

- Developed and maintained a log analytics web application using Java, Vaadin, MongoDB, and REST APIs.
- Implemented functionality for processing, searching, and analyzing system logs in Linux environments.

Technologies: Java, Vaadin, MongoDB, REST APIs, Tomcat, Linux, Jenkins, Git, Confluence

Nextrade Technologies (Startup) | Senior Java Full Stack Developer | 2013 - 2018

- Developed and maintained features for a web-based trading platform across backend, data, and frontend components.
- Mentored junior developers and participated in code reviews.

Technologies: Java, Spring, Groovy, Grails, Hibernate, SQL Server, SQL, REST APIs, Tomcat, Maven, Bugzilla, HTML, CSS, JavaScript, jQuery, SVN

Prodware | Microsoft Dynamics AX Developer | 2011 - 2013

Malam-Team (Coral) | Java / JSF Full Stack Developer | 2007 - 2010

Bezeq | Telecommunications Field Operations / Project Team Leadership | 2000 - 2007

Education & Professional Development

B.A. in Science, Computer Science Major - The Open University of Israel | 1999 - 2005
Graduated with Honors; Dean's Honors List

- Software Architecture & System Design (2023 - 2024)
- Spring Boot 3 & Spring Framework 6
- Docker & Kubernetes - hands-on labs
- AWS - EC2, S3, and CloudWatch
- Apache Kafka Essential Training
- Conducting Code Reviews - LinkedIn Learning
